SPACE X

An Educational Space Shooter

Shooter | **Ages 6–15** | **9 Solar System Facts** | **Python + Pygame Zero**

Steer your ship through an asteroid field, shoot what you can, dodge what you can't — every time you lose, you learn a fact about the solar system. The loop is the journey: from launch to the fact you learn every run.

CONTROLS: ←/→ steer • SPACE start/fire • P pause • R restart • F fullscreen

THE HERO'S JOURNEY — FIVE BEATS

Once upon a time…

THE TITLE SCREEN

A small ship waits at the edge of the solar system. "SpaceX is an educational game to learn about our solar system." Press SPACE to launch.

One day…

LAUNCH

The pilot flies into the asteroid field with three hearts. Steer with ←/→, fire with SPACE; every asteroid shot scores a point.

Because of that…

RISING STAKES

The more the pilot scores, the harder space fights back. Level rises every 30 points; asteroids come faster and more often. Any hit or miss costs a heart.

Until finally…

GAME OVER

The last heart is gone. Your high score is kept for the next run. A fact about a planet appears.

And ever since then…

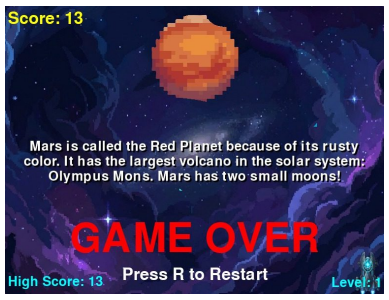

A NEW FACT EVERY RUN

Every crash teaches something: the game shows a fact about the Sun or one of the 8 planets. Press R to relaunch a little wiser.

THE SOLAR SYSTEM — 9 CELESTIAL BODIES

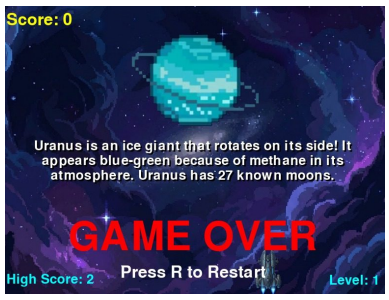

GAME OVER SCREENS — PLANET FACTS

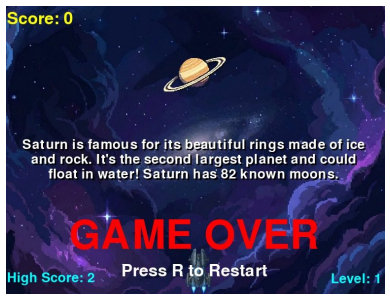

Mars Fact

Earth Fact

Uranus Fact

Saturn Fact
