PIXEL VERSE STUDIOS

16-BIT WORLDS. 32-BIT HEARTS.

Story-driven pixel-art games that teach while you play

■ Crab Quest | ■ Space X | ■ Handcrafted | ■ Python + Pygame Zero | ■ No Microtransactions

OUR STORY

We build honest, educational pixel-art games with an old-school spirit: a crab learning about ocean conservation, a ship learning about the solar system. No micro-transactions, no gacha, no fleecing the parents. Just games that teach while you play. Everything is handcrafted in Python with Pygame Zero, from the sprites to the sound. We believe small games can carry big ideas.

01 HANDCRAFTED PIXEL ART

Every sprite, background, and splash frame is drawn by hand. No AI shortcuts, no generic asset packs — pure pixel craft.

02 THE HERO'S HEART

We build each game around the classic hero's journey. Our protagonists fail, learn, transform, and come home with something to share.

03 COMMUNITY-FIRST CRAFT

We build in the open. Iterative playtest builds and player feedback shape the chapters, pacing, and difficulty as we go.

OUR GAMES

■ CRAB QUEST

Ocean-themed educational adventure for ages 8–14. Six chapters follow a crab's journey home — from a kitchen counter to a protected coral sanctuary — while raising awareness about marine life and ocean conservation.

Adventure	Ages 8–14	6 Chapters	Python + Pygame Zero

■ SPACE X

Educational space shooter for ages 6–15. Steer through asteroid waves across the solar system, and learn a fact about a planet every time you lose. 9 solar system bodies, procedural difficulty scaling.

Shooter	Ages 6–15	9 Planets	Python + Pygame Zero

THE TEAM — THREE PEOPLE, ONE ARC

MARIAM

Game Design & Narrative

Shapes the hero's journey, writes the story beats, designs the educational arc.

SALAH

Pixel Art & Animation

Hand-draws every sprite, background, and effect. Pure pixel craft.

SLEEM

Code & Systems

Builds in Python with Pygame Zero. Gameplay, physics, planet facts, sound hooks.

FROM SKETCH TO PIXEL — OUR PIPELINE

Step	Phase	Description
Step 1	CONCEPT & SKETCHES	The idea, the six-stage arc, and the education goal on paper.
Step 2	PIXEL ART	Sprites and backgrounds painted one pixel at a time.
Step 3	CODE	The game is built in Python with Pygame Zero for the desktop.
Step 4	MUSIC & SOUND	Chiptune cues for every jump, every hit, every planet fact.
