CRAB QUEST

An ocean-themed educational adventure for ages 8–14. Six chapters follow a crab's journey home — from a kitchen counter to a protected coral sanctuary — while raising awareness about marine life and ocean conservation.

Once upon a time… THE REEF
A small crab lives among the fish, clams and sea stars of the reef.

One day… KITCHEN ESCAPE (Ch. 1)
Stranded on a kitchen counter. Jump across 7 platforms to reach the goal.

Because of that… BEACH RUN (Ch. 2)
Cross the beach while seabirds dive. Survive 30 seconds, reach the wave.

Because of that… SEA FLOOR DODGING (Ch. 3)
Plastic trash rains down. Dodge for 10s, follow the turtle to safety.

Because of that… SHRIMP HELP (Ch. 4)
Play as the shrimp: collect 17 algae in 60s to feed the crab.

Until finally… PREDATOR CHASE (Ch. 5)
A red predator fish hunts across the reef. Survive 45 seconds.

And ever since then… HOME SWEET HOME (Ch. 6)
Run to your family in the protected coral sanctuary. Reunited!

Controls: ←/→ or A/D move • SPACE jump • R restart • ENTER level select

SPACE X

An educational space shooter for ages 6–15. Steer your ship through an asteroid field, shoot what you can, dodge what you can't — every time you lose, you learn a fact about the solar system.

Once upon a time… THE TITLE SCREEN

A small ship waits at the edge of the solar system. Press SPACE to launch.

One day… LAUNCH

Pilot flies into the asteroid field with three hearts. Steer ←/→, fire SPACE.

Because of that… RISING STAKES

Level rises every 30 points. Asteroids come faster. Hit or miss costs a heart.

Until finally… GAME OVER

Last heart gone. High score kept. A fact about a planet appears.

And ever since then… A NEW FACT EVERY RUN

Every crash teaches: Sun, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune. Press R to relaunch.

Solar System: Sun + 8 Planets • Controls: ←/→ steer • SPACE start/fire • P pause • R restart • F fullscreen

THE STUDIO PHILOSOPHY

We make curated, crafted adventures that feel like a quest and play like a lesson — pixel art drawn by hand, gameplay tested on real controllers, stories that stay with you.

01 HANDCRAFTED PIXEL ART

Every sprite, background, and splash frame is drawn by hand. No AI shortcuts, no generic asset packs — pure pixel craft.

02 THE HERO'S HEART

We build each game around the classic hero's journey. Our protagonists fail, learn, transform, and come home with something to share.

03 COMMUNITY-FIRST CRAFT

We build in the open. Iterative playtest builds and player feedback shape the chapters, pacing, and difficulty as we go.

WHY FEWER PIXELS EVOKE GREATER HEART

Pixel art leaves the details to you. A red square with two black eyes is a menacing fish only because your imagination says so — and because the story, the pacing, and the sound did the rest.

■ MEET THE PIXEL SMITHS

A small studio that makes small games about big things — the ocean and the solar system — one pixel at a time.

MARIAM — Game Design & Narrative
Shapes the hero's journey, writes the story beats, designs the educational arc.

SALAH — Pixel Art & Animation
Hand-draws every sprite, background, and effect. Pure pixel craft.

SLEEM — Code & Systems
Builds in Python with Pygame Zero. Gameplay, physics, planet facts, sound hooks.

FROM SKETCH TO PIXEL — OUR PIPELINE

Step	Phase	Description
Step 1	CONCEPT & SKETCHES	The idea, the six-stage arc, and the educ
Step 2	PIXEL ART	Sprites and backgrounds painted one pix
Step 3	CODE	The game is built in Python with Pygame
Step 4	MUSIC & SOUND	Chiptune cues for every jump, every hit,
