GAMES CATEGORY · 2026

Pixel Verse Studios

Real science, hidden in play.

Two 16-bit games for ages 5 to 99. Dodge ocean trash. Fly to Jupiter's icy moon. Every fact in them is real.

01 · THE PROBLEM

Science facts feel far from play.

Facts stay sentences

A child hears “Europa hides an ocean” in a lesson, and the next day it is gone.

Fun and facts rarely meet

Games entertain and lessons explain, but few put a real fact inside the play.

Facts need a reason

A child who must dodge plastic or fly through Europa’s ice has a reason to care.

WHO IT'S FOR

Made for anyone who likes a short, friendly game.

01

Children

A short game they can finish, with a fact they remember.

02

Families

Something to play together on one computer.

03

Teachers

Real science inside a game for the classroom or computer lab.

04

Pixel-art fans

Two complete games with a clear story and 16-bit art.

OUR SOLUTION

Pick. Play. Learn.

1

Pick

A game: Crab Quest with 6 chapters, or Space X with 4 levels.

→

2

Play

Jump, dodge, collect and shoot with the arrows and Space.

→

3

Learn

A real fact after each Space X level, and a planet fact whenever you lose.

Crab Quest: chapters 1–3

Chapter 1

Kitchen Escape

Goal Jump up 7 kitchen counters to the way out at the top right.

Challenge Timing each jump; no timer, so take your time.

Story A crab is caught in a kitchen and must escape back to the sea.

Chapter 2

Beach Run

Goal Survive 30 seconds, then run into the ocean wave.

Danger Seabirds dive from the sky anywhere on the beach.

Learn Seabirds hunt crabs on open sand.

Chapter 3

Sea Floor Dodging

Goal Dodge for 10 seconds, then follow the sea turtle to safety.

Danger Plastic bottles and trash sink from the surface.

Learn Plastic in the ocean traps sea animals.

Crab Quest: chapters 4–6

Chapter 4

Shrimp Help

Goal Play the shrimp: collect all 17 algae on 23 platforms.

Challenge A 60-second timer, and the algae are spread high and low.

Learn Sea animals help each other: the shrimp feeds the tired crab.

Chapter 5

Predator Chase

Goal Stay alive for 45 seconds.

Danger A red predator fish patrols the sea floor; jump over it.

Learn Small animals survive by watching and dodging predators.

Chapter 6

Home Sweet Home

Goal Run and jump to your crab family.

Ending Reunited in a protected coral sanctuary.

Learn Protected reefs give sea life a safe home.

Space X: levels 1–2

Level 1

Launch pad

Goal Walk the Hero and collect helmet, ammo crate, lucky football and fuel can, then board the Ship.

Challenge A 30-second countdown. Run out and it is game over.

Fact Rockets carry their own oxygen: there is no air in space to burn fuel.

Level 2

Earth orbit

Goal Dodge 10 pieces of space junk. The Ship cannot shoot here.

Challenge 3 hearts; every hit costs one.

Fact Thousands of old satellites and rocket parts circle Earth at 28,000 km/h.

Space X: levels 3–4

Level 3

Asteroid belt

Goal Shoot 30 asteroids. The Ship fires a football every half second; Space adds more.

Challenge A rock that hits the Ship or slips past costs a heart, and rocks come faster as you score.

Fact The belt sits between Mars and Jupiter; its rocks are far apart, so ships fly through.

Level 4

Europa

Goal Break 12 ice chunks, then scan Europa for 3 seconds.

Challenge Each chunk takes two hits (the first cracks it); one that slips past costs a heart.

Fact Europa's salty ocean holds about twice the water of all Earth's oceans. Then: Jupiter!

Learn on the way.

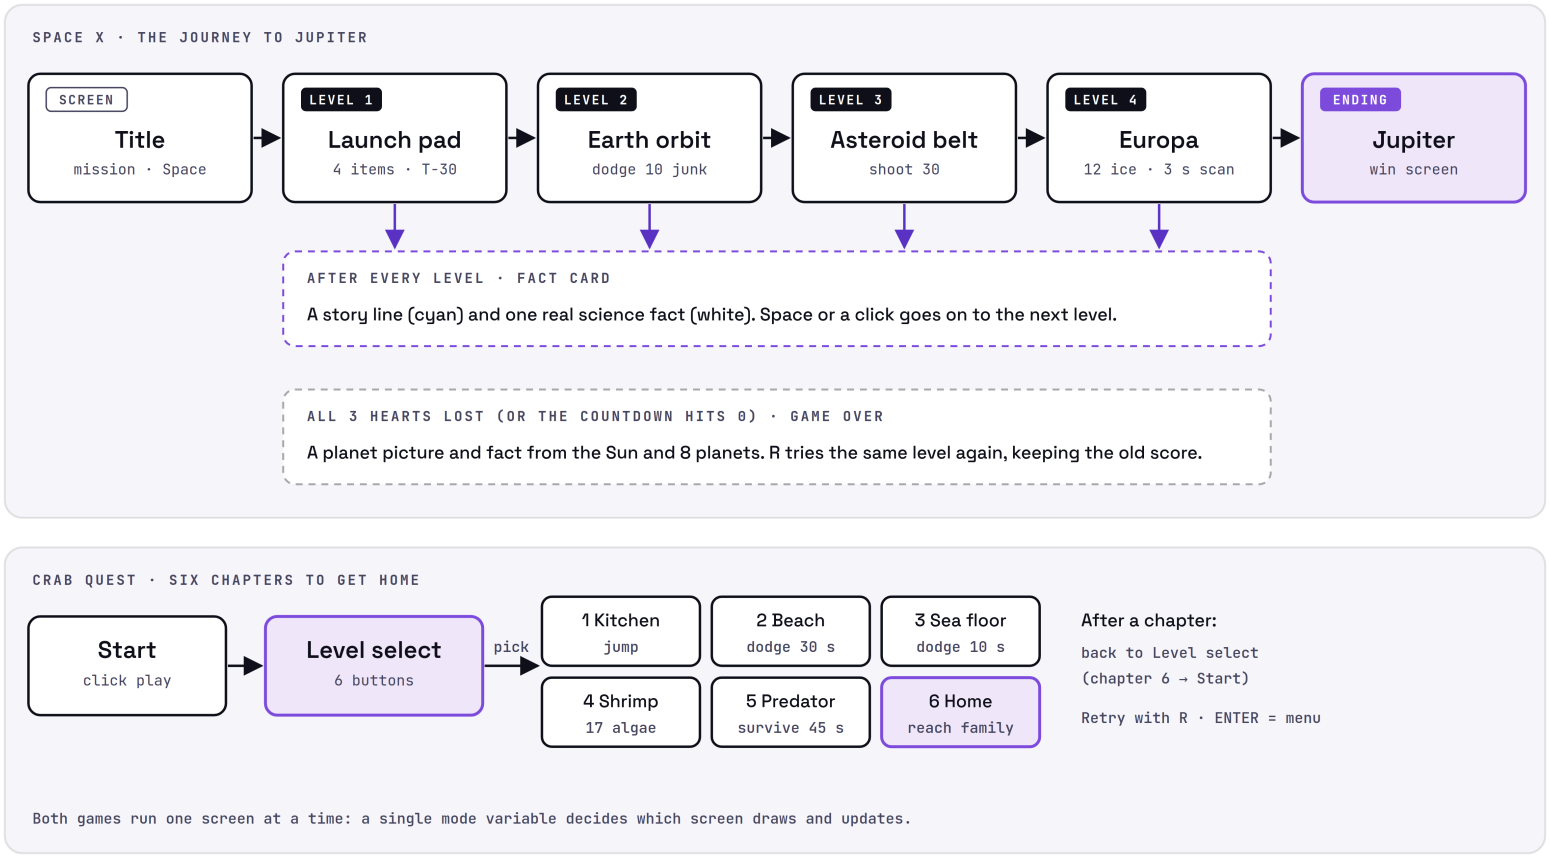

Fact card: after every level, a story line in cyan and one real science fact in white.

Game over: a planet picture and fact. R tries the same level again.

One screen at a time.

3

hearts in each flying level of Space X

30

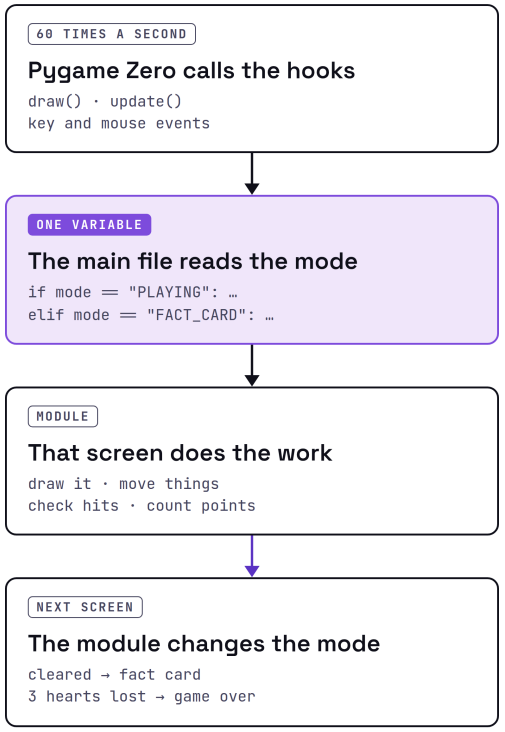

seconds on the Launch pad countdown

9

planet facts: the Sun and eight planets

Built so a beginner can read every line.

HOW A FRAME IS DRAWN · BOTH GAMES

WHO OWNS WHAT

	CRAB QUEST	SPACE X
ENTRY FILE	main.py	Game.py
MODE VARIABLE	game_states.game_mode	parts/game_states.mode
MODES	START_SCREEN, LEVEL_SELECT, LEVEL1 to LEVEL6	TITLE, PLAYING, FACT_CARD, GAME_OVER, WIN
LEVELS	level_1.py to level_6.py	levels/: launch_pad, earth_orbit, belt, europa
OTHER SCREENS	start_screen.py, level_select.py	screens/: title, fact_card, game_over, win
SHARED PARTS	Mute button in main.py	parts/: ship, controls, hud
FACTS & NUMBERS	Inside each level module	data/: level_data, game_data
ASSETS	images/ · music/	images/ · music/ · fonts/
PYTHON FILES	10	19

No classes in either game. Each module can be read on its own, top to bottom.

2 games, one repository

10 levels: 6 chapters and 4 flights

29 Python files across both games

0 classes: plain variables, ifs and loops

Python + Pygame Zero for the games · facts and level targets in plain lists · images, music and a pixel font in each game folder.

WHY THE NAME

Pixel Verse Studios

Pixels are the building blocks of our 16-bit art. A verse is a whole universe to play in. The logo shows a purple and cyan ring around a gold star and a game controller pad: a game that opens a world.

Thank you.
